April 14, 2020

Dear Parents/Guardians

Good afternoon Woodland Hills School District families. Today we began our online instruction. We had a delay on the Odysseyware (K-5) which by latest update should be soon resolved and ready for launch by end of business today. The delays were caused by the overwhelming demand within the company for access to the program which created a backlog in the implementation process. So please be on the lookout for information from your child’s teacher. Edgenuity (6-12) is up and running. Both programs allow for a blended learning approach that our teachers will monitor and assist with as students complete various lessons, assessments and activities that are interactive. As of 3pm today we have had over 57% of scholars signing in and participating.

In response to moving to an online platform we have created our helpdesk call in system. If you have a log-in (student ID or password) problem. Please visit our COVID update tab and go to help desk. This will provide you with the current phone number and extension to answer your questions.

Also, please visit our COVID tab daily as all current updates will be placed there as well as District and School social media site links. The tab is currently evolving to meet the needs of staff and students. The biggest change will be the information on the tab will be divided by grade levels K-5 and 6-12 because of the unique and specific needs of these grade levels.

Once again these are unprecedented times, we are all working to provide the most robust and complete education system possible.

Thank you for all you do for our students...

Sincerely,

James P. Harris

James P. Harris,
Superintendent
Woodland Hills School District
